

Lead the charge... install a battery

The Solar Homes program is supporting eligible Victorian households to install a solar battery to complement an existing solar PV system, by providing a half-price discount up to \$4,838.

Installing a battery can help typical households save on average up to \$640 a year on their energy costs.

The battery program is targeting growth areas with high levels of solar.

We have identified these postcodes for the initial phase of the program.
